

Mr. Otte,

First of all, on behalf of all the teachers and students of Wanquan primary school, I congratulate the "fight against new coronavirus" benefit concert in Berlin on its success. The importance and uniqueness of this concert are self-evident. It not only shows all of us the determination and courage of mankind to work together to overcome the epidemic, but also we felt the sincere friendship between the Chinese and German people. This is a heartfelt support! I was very moved when I learned that, Lia and Lieselotte, two students from Bruno-H.-Bürgel-Grundschule, reported their experience of exchange in Beijing in May 2019 and their expectations of a return visit from Beijing Wanquan primary school in the fall of 2020. Time seems to have returned to May 2019. Although the children from two schools do not speak the same language, they do not have the least influence on their classes, sports and games together. The children's friendship grew during the 12-day exchange. Teachers from the two schools discuss and teach together. In the exchange of visits, the theme of our project is getting deeper and deeper, and the result is more and more remarkable. For the past 18 years, we are pleased that Bruno-H.-Bürgel-Grundschule and Wanquan primary school have maintained an enduring partnership and achieved remarkable results. I was also touched that Mr. Otte took an active part in organizing the anti-epidemic concert, this spirit is worthy of praise and learning.

I will post the poster of your concert on the official website of the school and spread the good news to all the teachers, students and parents in our school. Everyone will see that the friendship between teachers and students of two schools. And the friendship will be stronger and deeper after going through difficult times. Although our original appointment to Berlin in the spring of 2020 may be postponed, our hearts will always be together. And we always feel the care, warmth and support from you and your school. As the saying goes, a friend in need is a friend indeed! A sudden outbreak of the disease shows that the friendship between our two schools has become stronger and deeper in the difficult times. We all believe that everything will be fine. I wish the cooperation project between the two schools will be better and better! I wish our friendship will be everlasting.

Jin Xiaoxia
